Useful Keyboard Shortcuts

Whether you are researching a topic, writing a paper, or chatting on Facebook (or all three at once!), learning a few, simple shortcuts can make your work much easier. Most shortcuts below will use the Ctrl (PC) or command/

Select the Address Bar

Send your cursor to the address bar when you want to navigate to a new site.

Mac   & L

 PC   Ctrl & L

Open (in a) New Tab

Tabbed browsing keeps multiple webpages open in the same window. These shortcuts make it even simpler.

Mac   Create tab: & T   Open link in new tab: & click link

 PC   Create tab: Ctrl & T   Open link in new tab: Ctrl & click link

Cycle through Windows and Apps/Programs

Switch between windows within a program, or between open programs.

Mac   Change windows: & `
